Attention CMAC Members

CMAC Flying Field: Change to Access Arrangements

As many members will be aware, it is several years since the Club changed the lock which secures the main access gate to our Flying Field. The same key also operates the lock on the access door to our new Clubhouse. Because of the time that has passed, numerous keys are held by ex-members who no longer belong to CMAC, and there may be a few which were loaned to contractors and not returned.

The Management Committee has now decided to change the access locks as from 1 July 2010.

In order to avoid the cost and logistical complications associated with fitting new locks and distributing a large number of new keys to Club members, the change is being implemented through the one-off purchase and installation of a good quality combination lock for the main gate, plus a key-pad combination lock for the access door to the Club-house. This purchase will not only simplify implementation of the current change; it will facilitate all such changes in to the future.

The keying arrangements for the toilet door are not to be changed, but a copy of the relevant key will be made available inside the Club-house, for use by members who may forget to bring their own key.

Although the changeover will formally occur on 1 July, the combination locks will be fitted prior to that date, and **the old key-lock will remain on the main access gate until 31 July 2010.**

All financial CMAC members will be advised of the relevant combination lock numbers by email or post, prior to the old key-locks being taken out of service on 31 July.

CMAC Management Committee
